Assignment01 - Data types

Due date: 04/10/2018 9:00pm

1. Create a Python script in Atom name: `assignment01.py`

2. Create a variable name `profile` with value as a `dict` to represent a Person's profile information.
   Note: `dict` is a unordered collection of key value pairs. Value can be of any other Python object e.g `str` , `dict` , `list` or `tuple` etc. Feel free to go as granular as you want.

```
NAME: Mildred D. Robertson

ADDRESS:

Street: 438 Redbud Drive
State: New York, NY
